

WavePOS for iOS

Application Featured in Apple's App Store

WaveSoft Technologies, a leading developer of mobile point of sale applications for the hospitality industry, would like to share their latest development: WavePOS for iOS. Through this product introduction, WavePOS is available for use with all iPod, iPhone and iPad devices.

While WavePOS has made it possible for you to take orders, print checks, and process payments from anywhere in a restaurant, the WavePOS for iOS products makes it possible for the user to perform those functions with a variety of Apple devices. WavePOS for iOS is able to do everything WavePOS for CE can do, including seamlessly interface with WaveBridge, thus offering all essential Table Service restaurant and QSR line-busting features. The WavePOS for iOS product will also be among the over 500,000 iOS App's featured in Apple's App Store.

"With the availability of WavePOS for iOS, our solution has the ability to work with the most popular mobile devices in the marketplace, including Apple," stated CEO and President of WaveSoft, Wilson Chao. "WavePOS is a comprehensive mobile solution that integrates with virtually any POS hardware, software combination."

In 2012, the company announced that WavePOS 2.0 was available for Independent Software Vendors (ISV's) and their reseller partners. It is PA-DSS certified which ensures secure and fast table-side payment processing.

About WaveSoft Technologies Corporation

Since 1996, WaveSoft Technologies has been delivering mobile point of sale software applications for the hospitality industry. Our mobile software application enables users to perform wireless order entry and line-busting applications and integrates seamlessly with virtually any third party point of sale software application.
