

WavePOS for Aldelo Now Available for Use with iPad® and iPad Mini®

Vancouver, BC – March 6, 2013 – WaveSoft Technologies, a leading developer of mobile point of sale applications for the hospitality industry, recently announced that their WavePOS for Aldelo app has been optimized for the Apple® iPad® and iPad Mini®.

WaveSoft has redesigned the layout of the WavePOS for Aldelo app so it is no longer limited to the screen resolution of the iPod touch® or iPhone®. The optimization will turn the graphics into HD versions which will make full use of the newer retina based mobile devices. Optimizing the application for the iPad® and iPad Mini® will enable users to more effectively view Aldelo's layout with the larger screen size.

“We have experienced an increased demand for our software applications to work on tablet devices,” stated Wilson Chao, President of WaveSoft. “By having WavePOS for Aldelo available on the iPad® and iPad Mini®, users will now have the ability to more easily view orders and other information on a larger display format which improves workflow.”

WavePOS is PCI certified and an Aldelo ready solution that is fully integrated with Aldelo EDC 6.2. With WavePOS for Aldelo, users will be able to synchronize their full menu, modifiers and other systems configurations from Aldelo onto the iPhone®, iPod touch®, iPad® and iPad Mini®. This capability gives Aldelo users a consistent ordering experience on handhelds, tablets and stationary POS terminals.

WavePOS for Aldelo can be downloaded free of charge from the Apple App Store. For more information, visit www.wavesoft.com/aldelo.

About WaveSoft Technologies Corporation

Recognized as a pioneer in the mobile point-of-sale industry, WaveSoft developed the world's first Win/CE based POS solution in 1999. Our mobile software application enables users to perform wireless order entry, payment and line-busting applications and integrates seamlessly

with virtually any third party point of sale software application. WaveSoft products are sold through a worldwide eco-system of VARs and ISVs. For more information, visit www.wavesoft.com.
